

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	03 October 2026
Team ID	SWTID-2026-6200
Project Name	The Customer Support Ticket Priority Prediction and Automated Assignment System using Agentforce
Maximum Marks	4 Marks

Step-1: Team Gathering, Collaboration and Selection of the Problem Statement

Our team conducted a collaborative discussion to identify challenges faced in traditional customer support and ticket management systems. We observed that many support processes, such as ticket creation, priority assignment, issue tracking, and urgent-task management, are handled manually or through inefficient systems.

Problem Statement:

Current support systems lack proper automation and AI-based assistance for handling customer tickets, leading to delays in issue resolution, incorrect priority classification, increased manual effort, and poor support-team efficiency.

Step-2: Brainstorm, Idea Listing and Grouping

During the brainstorming session, all team members contributed ideas freely. The ideas were then grouped based on functionality, feasibility, and their potential impact on support operations.

Generated Ideas:

- Develop an automated ticket creation and management system
- Implement automated ticket priority classification
- Provide AI-assisted ticket analysis

- Create automatic urgent-task generation
- Automate ticket assignment and approval workflows
- Provide real-time ticket status tracking
- Send notifications for ticket updates
- Maintain centralized customer and ticket records
- Generate support performance reports
- Provide role-based access for support users and administrators
- Grouping of Ideas:
- Automation Features: Ticket management, priority classification, task creation
- AI Features: AI-assisted ticket analysis and recommendations
- User Experience: Status tracking and notifications
- Management System: Customer records, ticket history, and reports
- Access Control: Role-based access and permissions

Step-3: Idea Prioritization

The team prioritized the ideas based on their impact, feasibility, automation potential, and ease of implementation using Salesforce CRM.

High Priority Ideas:

- Automated Ticket Management Workflow
- Automatic Priority Classification
- AI-Assisted Ticket Analysis
- Automatic Urgent-Task Creation
- Medium Priority Ideas:
- Ticket Status Tracking

- Email and Alert Notifications
- Role-Based Access Control
- Low Priority Ideas:
- Advanced Analytics and Reports
- Extended Customer Support Features

Final Selected Idea:

Develop a Smart Customer Support Ticket Management System using Salesforce CRM with Agentforce that automates ticket handling, priority classification, AI-assisted analysis, and urgent-task creation, thereby reducing manual support effort, improving response time, and enhancing the overall user experience.
