

Project Planning Phase
Project Planning Template (Product Backlog, Sprint Planning, Stories, Storypoints)

Date	03 October 2026
Team ID	SWTID-2026-6200
Project Name	The Customer Support Ticket Priority Prediction and Automated Assignment System using Agentforce
Maximum Marks	5 Marks

Project Planning

- Agile methodology
- Epics → Stories → Story Points
- Sprint-based execution
- Velocity calculation used for estimation

Product Backlog and Sprint Schedule

Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team
Developer Setup	USN-1	As a system administrator, I want to configure the Salesforce environment for Support Ticket Intelligence so that the support automation solution can be developed.	2	High	IT
Data Modeling	USN-2	As an admin, I want to create the Support_Ticket_Intelligence__c object with required fields and relationships so that support ticket information can be stored systematically	1	High	IT
Data Modeling	USN-3	As a support user, I want support tickets to be associated with Accounts and Contacts so that customer ticket information can be identified for analysis.	2	Medium	IT
Automation	USN-4	As a support agent, I want an Auto-Launched Flow to retrieve the latest ticket and analyze its description so that ticket priority can be determined automatically.	2	Low	IT
Automation	USN-5	As a support agent, I want tickets to be automatically classified as High, Medium, or Low based on	1	High	IT

		configured urgency conditions so that critical issues receive attention first.			
Agentforce & Automation	USN-6	As an AI Agent, I want to analyze support ticket details and trigger the backend Flow so that manual ticket prioritization is reduced.	3	High	
Task & Assignment	USN-7	As a support manager, I want High-priority tickets to automatically create an urgent Task and assign the appropriate support level so that critical tickets are handled quickly.	3	High	
SLA Management	USN-8	As a support manager, I want the system to check SLA breach risk for older unresolved tickets so that potential SLA issues can be identified.	2	High	
Agentforce & Conversational Support	USN-9	As a support user, I want to provide an Account Name to Agentforce and receive the ticket ID, priority, assigned agent, and action message so that I can understand the ticket outcome conversationally	3	Medium	[Tea
Agentforce & Conversational Support	USN-10	As an AI Agent, I want to analyze support ticket details and trigger the backend Flow so that manual ticket prioritization is reduced.	3	High	

Velocity

Planned Velocity = Total Completed Story Points / Number of Sprints

Velocity = 44 / 6 = 7.33 Story Points per Sprint

This velocity can be used as a baseline for estimating future sprint capacity.
